

Play and Joy with Effect

HAPPINESS

The Moto Tiles bring happiness to people as a playful care technology from Denmark.

DANISH DESIGN

The Danish Design of Moto Tiles focus on an aesthetical, minimal and functional design where small is smart.

EFFECT

Fast and high effects proven with scientific effect studies in PubMed journals. The Moto Tiles system provides automatic documentation of effect.

ANYBODY, ANYWHERE, ANYTIME

The Moto Tiles system is very easy to use for anybody (any age, any culture, any education).

 - Brain Training
 - Sclerosis
 - Stroke

ELDERLY

- Balancing and Fall Prevention
 - Brain Training
 - Alzheimer's
 - Parkinson's
 - Osteopenia
 - Dementia

HEALTH

- Sports and Fitness
 - Home Use
 - Obesity

YOUTH

(children and teenagers)

- Children's Therapy
- Social Psychology

USE CASE FROM CHILDREN'S THERAPY:

The Moto Tiles are used in numerous settings and intervention areas to provide playful and enjoyable children's therapy for children with Intellectual Disability, Learning Difficulty, Autism, Down's Syndrome, Cerebral Palsy, ADHD, Cancer, Albinism, Dyspraxia, Ataxic Diplegia, Spastic Diplegia, Legg-Calve-Perthes, Meningitis, Sickle cell disease, etc.

"The playful approach provides good compliance and a high training effect in physiotherapy."

David Fusager Johnsen, Physiotherapist,
Children's Therapy Gentofte, Denmark

USE CASE FROM SCLEROSIS:

Doctors are using the Moto Tiles for training of patients with sclerosis, such as cerebellar ataxia. Doctor Nicola Saltarelli from Frosinone, Italy, reports that his sclerosis patients are "highly motivated and enthusiastic" when training with the Moto Tiles. For the cerebellar ataxia patients Doctor Saltarelli reports that after Moto Tiles training, he observes:

REHABILITATION

- Balancing and Fall Prevention
- Post-Traumatic Stress Disorder (PTSD)
 - Social Psychology
 - Muscle Atrophy
 - Brain Training
 - Sclerosis
 - Stroke

"Improved balancing and proprioception, and improved ability of lateral movements and left-right distinction."

Doctor Saltarelli, Frosinone, Italy

ELDERLY

- Balancing and Fall Prevention
 - Brain Training
 - Alzheimer's
 - Parkinson's
 - Osteopenia
 - Dementia

USE CASE FROM ALZHEIMER'S:

We have done very nice things with patients who have Alzheimer's in early stages, who are now losing the recognition of their close relatives. As all the sounds are customized, we record prior to the sessions the name of their children and the relationship, so, while the person is doing the physical process of pressing tiles, in one says Pablo, in another Mary, then son or daughter, and the patient has to recognize if Pablo is his son.

Sergio Mejia, Beln Health, Colombia

USE CASE FROM SPORTS AND FITNESS:

The Moto Tiles are used in sports clubs and fitness clubs for playful training. The Moto Tiles are distributed in Japan by Mizuno, the sponsor of the Italian Serie A football club SS Lazio, and the football club FC Copenhagen performs their motoric skill training of the best elite youth players playing games with the Moto Tiles every time changing the physical layout, enforcing competitive gaming which demands high levels of agility, mobility and endurance. Other examples include Global Yoga Kids in Japan, and Zabeel Ladies Club Eden in Dubai, UAE, using the Moto Tiles for fitness and wellness.

HEALTH

- Sports and Fitness
 - Home Use
 - Obesity

moto®

Moto brings life-changing effects in our world for people of all ages. With Moto changes can happen.

DID YOU KNOW THAT:

Children in Tanzania with cerebral palsy become joyful in therapy.

Refugee ladies from war zones in Afghanistan, Iraq and Syria with Post Traumatic Stress Disorder open up for social contact after joyful play.

moto®

Seniors in Denmark throw away their canes and walking frames after playful training.

In Colombia and Finland, fragile seniors regain their balancing and daily living skills after private home training as a service.
